

## Certificate of licence

This is to certify that AB Mauri Netherlands B.V. with its brand AB Mauri has been accepted as a holder of an ELS licence to display within Europe the official *Crossed Grain* trademark of the Association of European Coeliac Societies under the licence number listed below and issued by the Dutch coeliac society NCV.

**AB Mauri, licence number: NL-110**

Products	Licence/Product numbers
AB Wit Glutenvrij broodmix, 15 kg	NL-110-001
--	--

The range of gluten-free products listed under the licence must comply with the accepted NCV standard outlined in Appendix I.

**Date: 16/01/2020**

Andrea Newton-Wesselius  
Licence Manager

## Appendix I.

### Gluten-free standard for the NCV (Dutch coeliac society) licensing

Products must comply with the following criteria:

**1. Products must not contain** wheat, rye, barley, spelt, Khorasan wheat (sometimes sold commercially as Kamut®) or their hybridised strains as deliberate ingredients.

**The current level for licensing the Crossed Grain symbol is 20 parts per million (ppm), as defined in the Codex Alimentarius.**

**2. For your information the Codex Alimentarius:**

**\* Foods containing 20 ppm or less gluten**

Foods that contain 20 ppm or less will be able to be labelled 'gluten-free'. This labelling term may apply to naturally gluten-free products, products which contain gluten-free (Codex) wheat starch and pure, uncontaminated oat products which contain no more than 20 ppm gluten.

**3. Food, products or raw materials used in production must not be contaminated with any gluten-containing cereals during production or storage.**

**4. Oat products may be licensed as long as they are uncontaminated by gluten-containing cereals in all stages of production, e.g. milling, processing, storage and packaging. Uncontaminated oats are considered safe for most people with coeliac disease; however, some people with coeliac disease may be sensitive to them. If uncontaminated oat ingredients are used in a product that is 'gluten-free', the oat ingredient must have a gluten content that is 20 ppm or less.**
